

The Maryland Occupational Therapy Association
presents its 2011...

Scholars Seminar

The Neurofunctional Approach to Rehabilitation

Guest Lecturer:

Gordon Muir Giles

PhD, Dip COT, OTR/L, FAOTA

Professor, Samuel Merritt University, San Francisco, California

The neurofunctional approach developed by Giles and Clark-Wilson has been shown to be as effective as cognitive intervention in assisting clients recovering from traumatic brain injury (TBI) to return to work, school, or independent living. Learn new evidence-based techniques in working with clients who have sustained a head injury.

REGISTRATION FOR MOTA MEMBERS IS ONLY.....

- ALL STUDENTS: \$15 WITH SPECIAL REGISTRATION CODE -

Price includes
