

## **Therapeutic Seating and Positioning: Evaluation and Intervention Strategies for Success**

### **Course Description:**

Proper seating and positioning promotes optimal functioning of the adult client in his or her environment. It has become a standard performance expectation for rehabilitation professionals to be skilled at providing comprehensive evaluations and interventions in this practice area. This essential one day seminar is designed to provide therapists and healthcare professionals with the knowledge of performing seating evaluations and basic bed positioning. Exploration of medical necessity and reimbursement guidelines including documentation strategies will enhance your ability to provide the necessary programming in your setting.
